

care instructions

Winsor & Newton easels are hand crafted from FSC Seasoned Beechwood, twice coated with premium varnish.

- Taking good care of your Winsor & Newton easel is essential to ensure a lifetime of use. These simple tips will ensure the longevity of your Winsor & Newton easel.
- The wood on your easel has been carefully dried, retaining just enough moisture for your easel to acclimatise to the relative humidity.
- Due to its natural composition, parts of your easel may expand or contract depending on the levels of humidity in your home or studio. This will not affect your easel's quality or strength.
- Avoid placing your easel directly in front of heaters or fireplaces.
- Avoid exposing your easel to continuous sunlight.
- Remove abrasive particles from the surface of your easel by dusting with a lightly moistened cloth.
